STUDIES **EFFICACY**
OF DRUGS & TREATMENT IN
ALLERGY, ASTHMA
IS NOT TO THE FULLEST

The best medicines and advice by doctors gets limited due to exposure of the patient to dust-mites.

Many doctors recommend plastic sheet underlay as a barrier against dust-mites.

Plastic sheets are not comfortable. Noisy and disturb sleep. Non breathable and sweat more.

COMFORTABLE

SLEEPSAFE is a result of long scientific studies & technical discussions with doctors and experts in India & abroad. SLEEPSAFE is the most suitable product for mattress protection. In fact, it really is a health protector!

SLEEPSAFE is a thin, soft, waterproof, dust proof mattress protector that can be easily fitted on the bed/pillow. It is also washable.

HOW DOES IT WORK?

SLEEPSAFE is laminated with a special membrane that does not allow any liquids, dust, infection to pass from the outside to get into your bed & vice-versa. Yet, it is breathable!

recommend
sleepsafe
as protective
bedding
instead of
plastic sheets
